

"ZIRCONIUM" CLOTH

DETROIT INDUSTRIES
MANUFACTURE D'ABRASIFS FLEXIBLES

PRODUCTS

Main characteristics

Electrostatic coating of "Zircon" abrasive grains makes these products particularly aggressive and long lasting on all sorts of material.

ZKR zircone polyester cloth

Long lasting, ZKR works out very well with high pressures. Cuts down on production costs. This product is waterproof.

ZCR zircone cotton cloth

Coated on a strong cotton cloth, it is a more economical product to be used mainly in finishing stainless steel.

General Characteristics

	ZKR	ZCR
Base cloth	Polyester Y	Cotton X
Bonding agent	Resin / Resin	Resin / Resin
Abrasive	Zircon	Zircon
Structure	Closed	Closed
Available grits	P. 120 – P. 24	P. 180 – P. 36
Shapes	Belts/Rolls	Belts/Rolls

Applications

ZKR

Sanding and general finishing.

Center less sanding of pipes.

Surface sanding.

Largely used in the shoe industry.

Used on all non ferrous alloys.

ZCR

Fast sanding in the shoe and cutlery industry.
